INTRODUCTION

The Winnie Madikizela Mandela Local Municipality requires services of a suitably qualified service provider who will conduct pre-capacity building for the manufacturing hubs project. This programme is intended to upskill the 3 identified communities and thereby create a pool base of skilled workforce in Bizana who may participate directly or indirectly in the project upon operations.

BACKGROUND

The Municipality is in a process of developing 3 Manufacturing hubs, the main focus of these hubs will be to produce high-quality building material through technology driven machinery.

The feasibility study of the project is currently underway and includes geotechnical and land survey study, an environmental impact assessment and architectural designs.

When all the above are in place and all approvals have been received, implementation will commence, where the manufacturing plant will be built and all necessary equipment installed. Production will commence, where SABS approved building material such as building blocks, concrete, slabs and paving blocks will be produced.

The manufacturing sector forms part of the broader secondary sector of the economy that manufactures finished goods. All of manufacturing, processing and construction lies within the secondary sector. South Africa has a well-developed set of national standards which enable manufacturers and contractors to provide consumers with high-quality products. The South African Bureau of Standards operates in terms of the Standards Act, 1993, as the national institution for the promotion and maintenance of standardisation and quality in connection with commodities and the rendering of services.

Competition in the district with regards to manufacturing of building material is fairly high considering that retailing sector in the building material has already established supply chain of the building material. However, Government programmes such as sanitation and RDP houses are considered to be the main target market for manufacture building material.

The establishment of the Manufacturing hubs will be among one of government initiatives in the district that can play a significant role in bridging the existing gap in the market.

The Environment in which the manufacturing hubs will operate is affected by various Macro-Environment factors such as Political, Economic factors, Social, Technological and Legal factors. The following section outlines the Political, Economic, Social, Technological, Environment & Legal (PESTEL) analysis of the Manufacturing sector in South Africa and the impact it will have on the Alfred Nzo District. (14) CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
