2. DETAILED TECHNICAL SPECIFICATION

The purpose of this request is to appoint a service provider for the records management, archiving and tracking system for the SABC Records Management department for a period of 3 years.

The current tracking system is a process that uses barcodes used to link and identify both the file and location within the records vault. As archive boxes, files or documents are moved, the barcode is scanned by either barcode readers or by keystroke entry and the database should update thereby speeding up access and building a travel history of that specific file.
