

Questions and Answers for TNPA/2024/02/0029/56327/RFP

Question	Answer
1. T1.2 TENDER DATA, C2.1 item 3 Stage Three. Points are allocated if the tender entity is a EME or QSE. The question is, is this correct because the potential value of the contract might be much higher than the EME or QSE dedication. Secondly if it is correct will the tender entity score the full marks if it is a JV between a EME/QSE and a Large entity. The reason being is that the large entity will need to support the EME/QSE in capability and capacity.	Yes, this is correct because the ESD market analysis was conducted, and we realised that there are quite a number of Black-owned EMEs and QSEs in the market that can do the job. This specific goal aligns with the Preferential Procurement Regulations of 2022. Yes, a JV between an EME/QSE can score full points on the specific goals, provided that it provides a JV consolidated B-BBEE certificate that clearly indicates the certificate is a Black-owned QSE.
2. C3.1 – PURCHASER’S GOODS INFORMATION – Will you please re-issue drawings 110777 - 101 (General Assembly) and 10777 - 001 (Steel Panel Item 1) in a format that is readable and clear.	Drawings will follow soon
3. Due to the OEM’s that is not local in South Africa and we need time to prepare the proposal we request a two week extension on the submission date of the tender.	An extension has been granted due to delays in acquiring the necessary drawings. Addendum 1 has been issued extending the closing date to 6 October @ 16:00
4. Could you please confirm what testing and certification will be required for this tender?	The testing and certification required for the components being sought is specified in Section 2.3 of the Goods Information on the RFP
