Re: Queries related to Tender 31518 (5U) - The Cleaning of Grease or Fat Traps and Settling Tank and Disposal of Its Contents at uShaka Marine World

1. With regards to the peak periods, specifically June , September, November and December where the contractor is required to clean more often per week than normal, will there be an adjustment in the rate at those times.
Please advise further to peak periods.

The service calls for weekly cleaning. If, at any time, there is a need for additional cleaning outside the scope of this contract, a separate procurement process will be followed.
