SUPPLY AND DELIVERY OF DRONE CAMERA

Annexure B: TOR: / Specification

SUPPLY AND DELIVERY OF DRONE CAMERA

SPECIFICATION:

1. Fly Safer

Fly safer and farther than ever before with the Mini 4 Pro Drone Fly More Combo Plus with RC 2 Controller. Significant upgrades have been made to both vision sensing and transmission range compared to the last generation. Instead of tri-directional, the Mini 4 Pro has omni-directional obstacle avoidance for complete protection. Using OcuSync 4, the flight range is improved to up to 20km. Other new features include slower motion in 4K at 100 fps and complex route planning using Active Track. The Mini 4 Pro remains beginner-friendly at roughly 249 grams with a host of automatic flight modes, in addition to true vertical shooting for social media-ready footage without post-processing.

2. Fly More Combo Plus

This version of the Mini 4 Pro includes the Fly More Combo Plus group of accessories, which are meant to better equip you for a long day of aerial filming. The Fly More Combo Plus includes two additional intelligent flight batteries, providing you with up to 90 additional minutes of flight time, a two-way charging hub to help you recharge your batteries quickly, and a shoulder bag to carry your gear to your shooting location.

3. Complete Protection

Incorporating omnidirectional obstacle avoidance for the first time in the series, the Mini 4 Pro is fully protected from accidents and crashes with six fisheye and downward binocular vision sensors, a 3D ToF depth sensor, and a downward auxiliary light. The automatic avoidance is utilized by the advanced return to home feature, complex flight modes, such as Master Shots, and APAS (Advanced Pilot Assistance Systems) for smooth video capture.

4. Fly Farther With Ocusync 4

Range is dramatically improved with OcuSync 4, giving the Mini 4 Pro the ability to transmit from up to 20km away, a significant improvement over the 15km of the Mini 3 Pro. Even at this range, live view quality is improved to 1080p60 for smoother footage.

5. Professional Aerial Imaging

The integrated camera of the Mini 4 Pro features a 1/1.3" sensor with 4K HDR support, dual native ISO, an f/1.7 aperture, and large 2.4 μm pixels—just like the Mini 3 Pro. Except with the Mini 4 Pro, you now have the benefit of slow motion at a stunning 4K resolution. The imaging system's aperture and pixel size allow a considerable amount of light to enter the sensor, helping to reduce noise for better-quality low-light footage. Images and videos can be captured from farther away with up to 4x digital zoom, and professionals will enjoy support for 10-bit D-Log M and HLG colour modes.

6. True Vertical Shooting

The gimbal of the Mini 4 Pro is capable of rotating for true vertical shooting, so you can take video and image content straight from the drone and post it directly to your social media accounts.

7. Creative Modes And Tracking

A host of integrated features allow pilots of almost any skill level to pull off professional quality results with little effort.

Focus Track: This system includes Active Track, Spotlight, and Point of Interest for wide-ranging subject tracking. With the Mini 4 Pro, Active Track now offers Trace Mode and the ability to follow specific flight routes when tracking, compared to previous generations' fixed direction tracking.

Master Shots: Select your subject, and the Mini 4 Pro will automatically perform pro-

style manoeuvres for cinematic results using one of three shooting modes: Portrait, Proximity, and Landscape.

Hyperlapse: Create time-lapse shots with different shooting modes: Free, Waypoint, Circle, and Course Lock

Panorama: Capture stunning vistas in one of four available panorama modes: 180°, wide angle, vertical, and sphere. An integrated tilt angle is also used to better capture the sky in your panoramas.

Quick Shot: Dronie, Helix, Rocket, Circle, Boomerang, and Asteroid

Smart Photo

Intelligently adjusts and optimises contrast for capturing content with a high dynamic range, and it can even achieve the effect of simulated long exposure.

8. Night Mode

Take clearer images and videos of low-light areas with multi-scale noise reduction.

Cruise Control

Maintain a steady speed without having to continuously push on the controller stick.

9. Advanced RTH

The drone can intelligently set a course and return to its takeoff point if needed, and now, with the Mini 4 Pro, this feature can take advantage of omnidirectional obstacle avoidance to ensure it makes it back in one piece.

10. Additional Features

Bottom auxiliary light translates to more stable hovering at low altitudes

Quick Transfer downloads at up to 30 Mb/s over Wi-Fi

Large angle tilt

Customize sharpness and noise reduction

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
