5	As Eskom requires OEM-approved products, the make and model details of the vehicles concerned are required to facilitate the sourcing of pricing from the respective dealerships. The same requirement applies to canopies, PDCs, and related accessories. Upon receipt and confirmation of the vehicle models, sufficient time will need to be allowed for responses from the dealerships, as requests for vehicle-specific part numbers will need to be submitted and verified through their systems.	The tenderer must make provision for all makes and models that are sold within the public as the contract is for 5yrs and we might buy any of these models including the new models that are yet to be sold in SA.
