MAQUASSI HILLS LOCAL MUNICIPALITY

SUPPLY CHAIN MANAGEMENT — TENDER ADDENDUM NO. 2

Tender Number: MHLM/MIG/09/2026/27

Project Description: Underground Resource Management, Design, Construction, Monitoring of the Exploration and Equipping of Boreholes in MHLM (WSIG)

Original Closing Date: 26 October 2026 at 12h00

New Closing Date: 03 November 2026 at 12h00

Date of Issue: 7 October 2026

1. PURPOSE OF THIS ADDENDUM

This Addendum is issued to all prospective bidders to formally notify them of critical scope adjustments driven by Department of Water and Sanitation (DWS) compliance directives regarding raw water nitrate levels, and subsequent municipal budget prioritization.

Bidders are requested to amend their pricing schedules and technical proposals in accordance with the revised specifications detailed below.

2. KEY SCOPE MODIFICATIONS

A. Exclusion of Wolmaransstad Section

- **Scope Deletion:** The entire project scope, borehole equipping, and associated Bill of Quantities (BoQ) schedules for **Wolmaransstad (Ext. 17–19)** are hereby **completely removed** from this tender.

- **Strategic Justification:** This exclusion is executed as a financial and strategic prioritization decision to remain within the approved capital budget ceiling, while preserving Wolmaransstad boreholes (WBH02, Ext 13 BH1, and Ext BH H1) for future development phases.

B. Increased Scope: Water Treatment Upgrades (Filtration & Reverse Osmosis)
In compliance with DWS water quality standards (SANS 241:2015), elevated nitrate concentrations (22--29 mg/L) and other water quality exceedances identified during groundwater assessments require enhanced multi-stage treatment processes. The upgraded treatment scope per borehole is defined as follows:

Kgakala Boreholes:

KBH01: Media filtration with nitrate treatment.

- **KBH02:** Media filtration.
- **KBH04: Reverse Osmosis (RO)** due to raw-water quality and elevated nitrates (22 mg/L).

- **Lebaleng Boreholes:**

LBH02: Reverse Osmosis (RO) due to elevated nitrates (29 mg/L).

- **LBH03: Reverse Osmosis (RO)**.
- **LBH04: Reverse Osmosis (RO)** (with final capacity confirmed per specifications) due to elevated nitrates (26 mg/L).

3. AMENDMENTS TO BILL OF QUANTITIES (BoQ) & CLOSING DATE

1. **Revised Pricing Schedules:** Bidders must price **only** for **Lebaleng** and **Kgakala** scopes, incorporating the specific media filtration and Reverse Osmosis (RO) treatment plants outlined in Section 2 of this addendum.

2. **Extension of Closing Date:** To afford all potential bidders sufficient time to adjust their unit rates and technical submissions for the revised treatment scope, the tender closing date is hereby extended from 26 October 2026 to **3 November** at **12h00**.

Yours faithfully,

Approved
20/10/2026

Ms N.J. Mbonani
Municipal Manager

VISION	MISSION
To be a leading category B Municipality in the country.	"To provide quality and sustainable basic services to our community, cost-effectively, in a manner that supports growth and development with our municipality"
